

The **Lightstone Property Pro** app is now available. It can be used by toolkit subscribers to access various reports anywhere, anytime.

The Reports available are specifically designed to assist Property Professionals that are on-the-go all the time by providing the most needed information in an easily accessible and mobile manner. These reports include:

Property Report

provides all relevant information and helps gain an understanding of the value and history of a property as well as it's surrounding area.

Suburb Report

assists estate agents by arming them with in-depth knowledge of a suburb. It's useful to show buyers interested in purchasing in a particular area and is very handy at a show day.

Valuation Report

helps understand the market related Lightstone value of property.

EzContact Report

obtains contact information on clients.

No further subscriptions are required!

All that is needed is your current username and password.

Features amazing search functionality options.

Augmented reality camera searches and interactive map searches.

The tablet version has a fabulous presentation showcase allowing an easy display of properties that are for sale, or to showcase properties recently sold. It's the perfect way to show-off a property on sale at a show day!

- Any reports drawn using the app **will automatically be available** should you login from your desktop.
- **Property and suburb reports are inclusive reports** and will count towards the number of inclusive reports available according to your subscription choice.
- **EzContact and valuation reports** will be billed to your account as additional reports on a cost per report basis and you will only have access to these if they are enabled on your subscription account.
- **Costs and subscription options are available on our website.**
