

## Market View Report

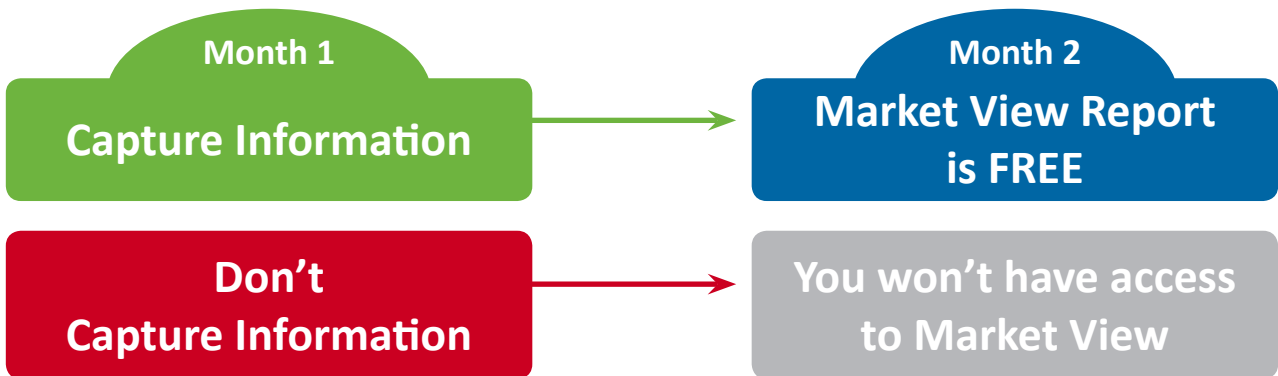

Market View allows users to search for a property and capture property sales information. This information is then added to the Property and Valuation reports, as well as Comparable Sales. A report per suburb is then available which provides details of all the most recent transactions captured for that area.

A user contributes as many sales records as possible, in return receiving free access to the Market View Report.

Access is available via the Lightstone Property Toolkit, added as an additional report or by signing up as a Market View only user.

## Pricing

*\*NOTE: Pricing is the same for Lightstone Property Toolkit subscribers as well as non-subscribers.*

### Access

Market View Report can be accessed through our website:  
**[www.lightstoneproperty.co.za](http://www.lightstoneproperty.co.za)**
