

We have a new report - it's called **Market View**

Market View gives you easier and more accurate market valuation information!

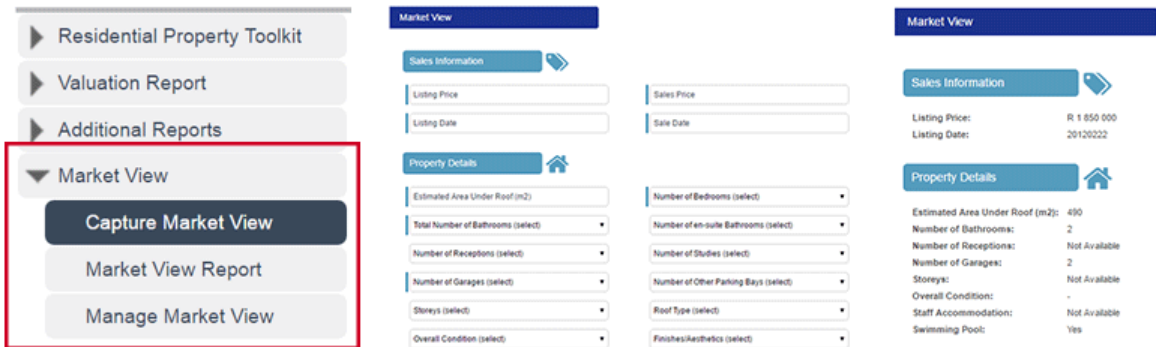

How?

Input **property feature information** like beds, baths, garages and more
Enter **listing** and **sales** pricing and dates to better manage clients' expectations

The information you input will be **available prior to registration**. Market View allows you to compare properties that are very similar which makes an accurate market valuation that much easier. The listing and sales date and price information is a great way to assist in managing sellers' expectations around a reasonable sales price.

Sales and feature information is added to the **Property** and **Valuation Reports**, as well as **Comparable Sales**.

Market View Pricing:

FREE
Trial period

FREE
ONLY if you have captured
at least 1 property sale
in month 6

Capturing details for at least **1 property a month** will allow you to qualify for the next month **free**. If you don't capture you will have to pay **R50.00** per Market View Report.

Access Market View through the [Property Toolkit](#), or by signing up as a Market View only user (for non-subscribers)

But wait there is more news...

Stand a chance to win a **R1000 Takealot Voucher** every month for capturing the most property sales information.

After 6 months, you could win an **Apple iPad** for capturing the most property sales information overall.

Note: Competition ends 31 December 2016. Anyone can capture, you don't need to be a Toolkit subscriber to win.
