

## Residential Property Indices

Date Published: 30 November 2015

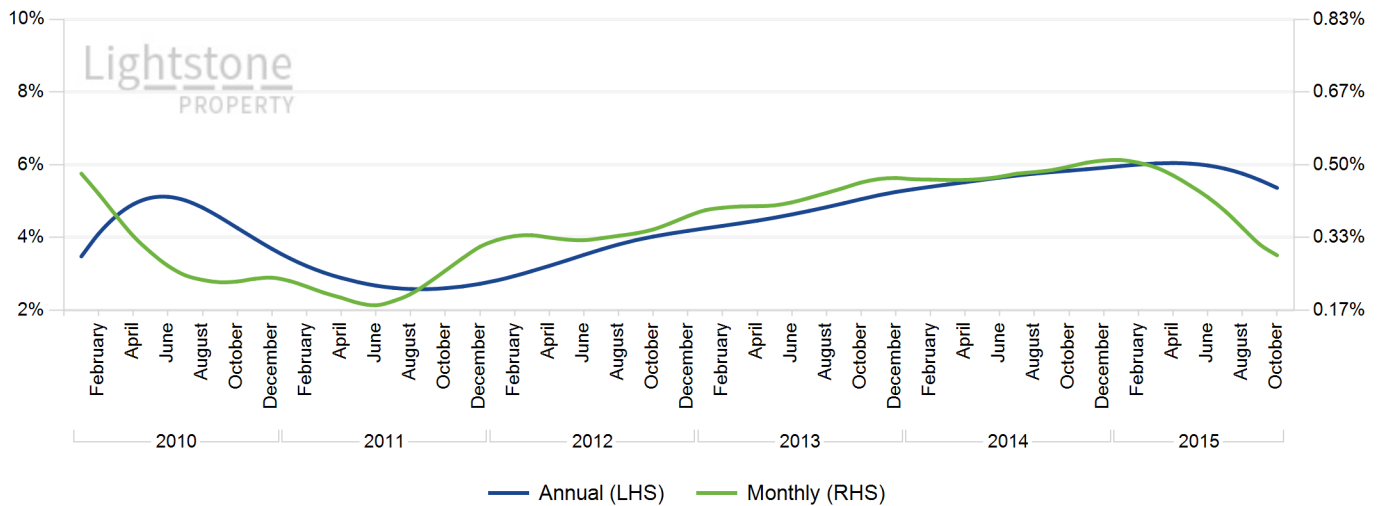

*Information. Decisions. Results.*

## National Inflation

Current annual inflation rate is 5.58% and monthly is 0.32%

### Annual vs. Monthly

## Market Review

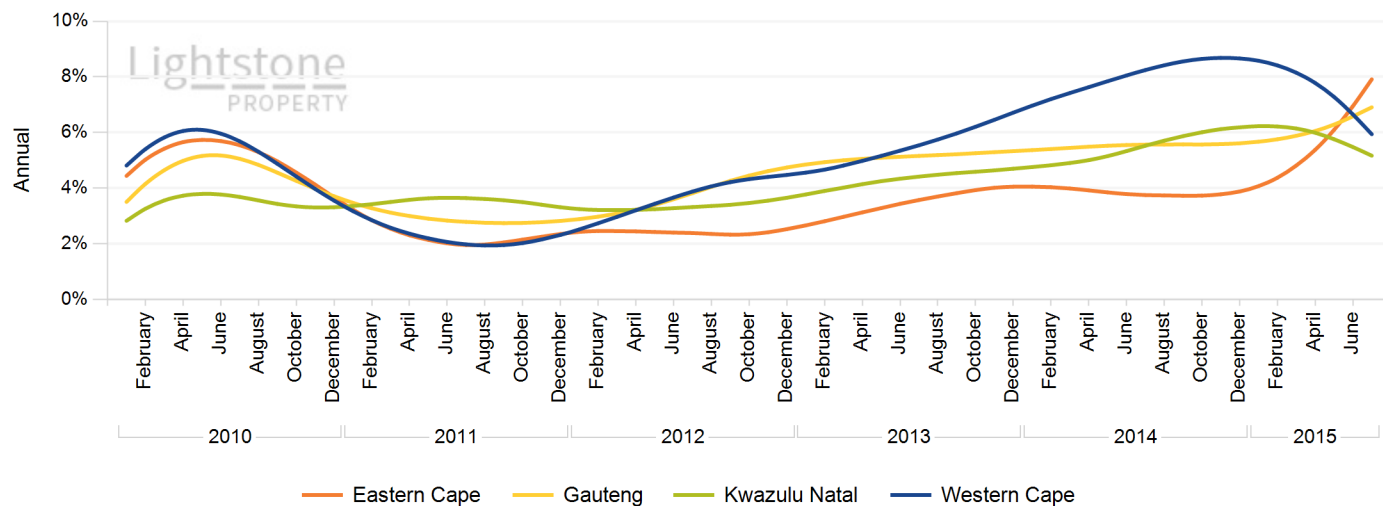

Annual residential property inflation for October 2015 was recorded at 5.36% down by 0.21% from the previous month. Lightstone's been reporting that house price inflation in the high value bands has been decreasing, in October we saw the low value segment join the other value segments with its annual inflation also starting to decline.

Over the past 2 years house prices in the low value segment increased significantly from 7.97% in August 2013 peaking at 32.59% 24 months later. This decrease was expected as the low value property inflation lags national inflation. It is expected that inflation in this segment will continue to decrease over the next 12 to 18 months and only start accelerating once national inflation picks up again.

## Provincial Inflation

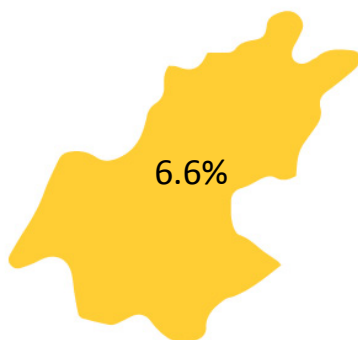

The **Lightstone Provincial Index** tracks annual inflation of the 4 major provinces in South Africa.

Annual Inflation: Major Provinces

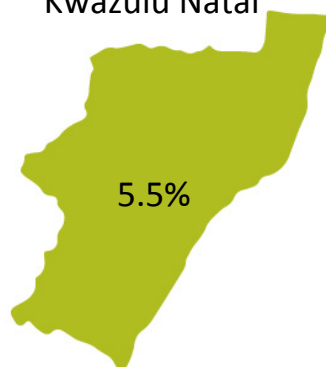

## Latest/Current Provincial Inflation Status

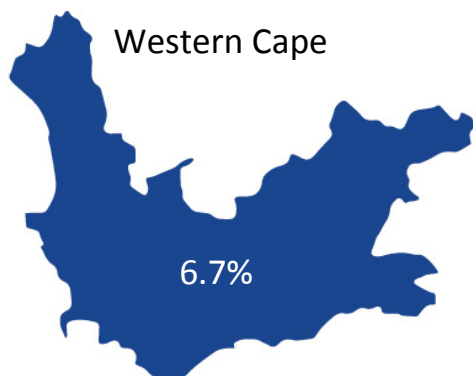

Gauteng

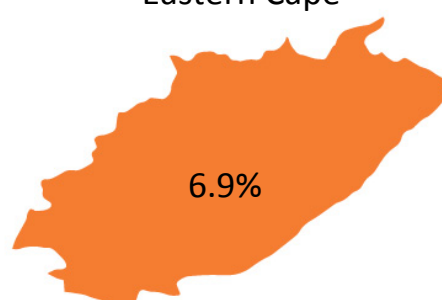

Kwazulu Natal

Western Cape

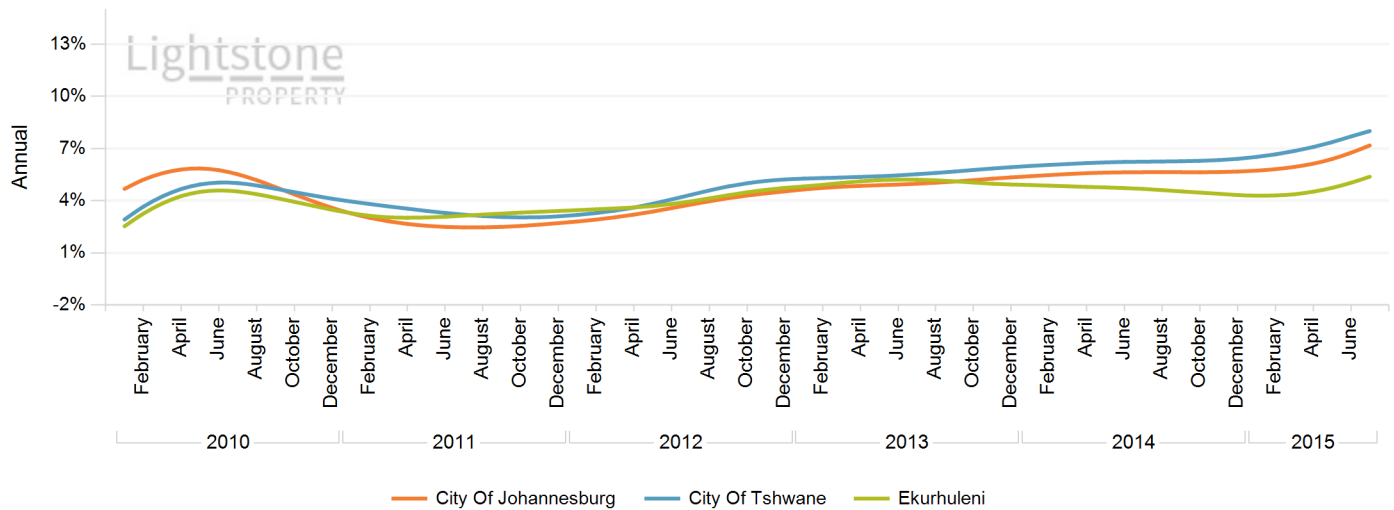

Eastern Cape

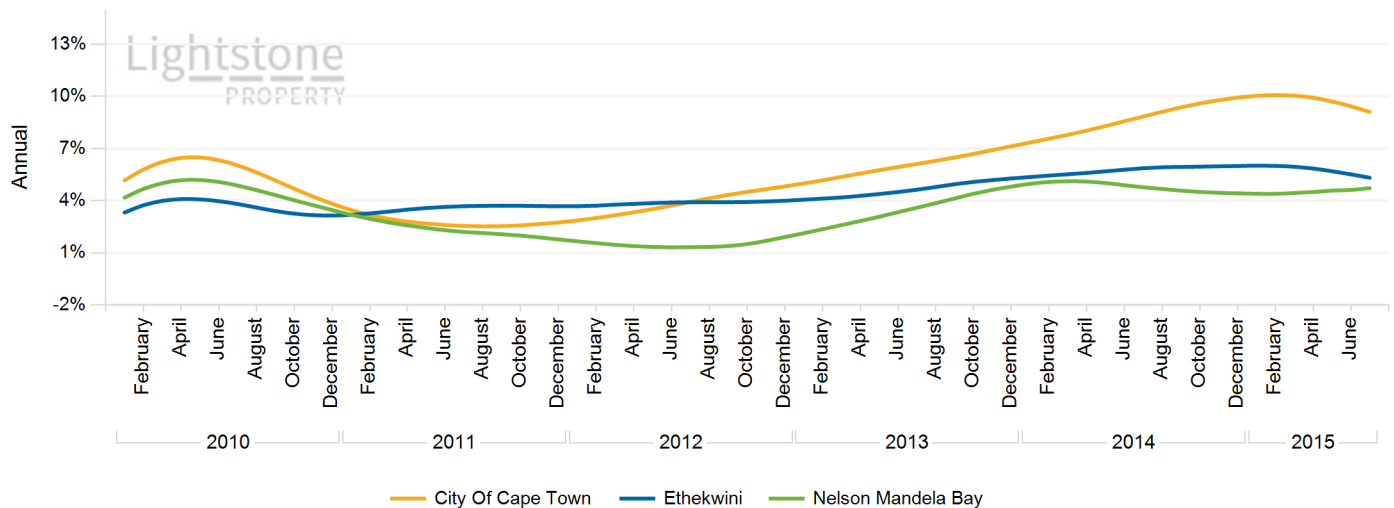

## Municipal Inflation

The Lightstone Municipal Index tracks annual inflation at a municipal level, with coastal and inland based municipalities reviewed independently.

### Annual Inflation: Inland Municipalities

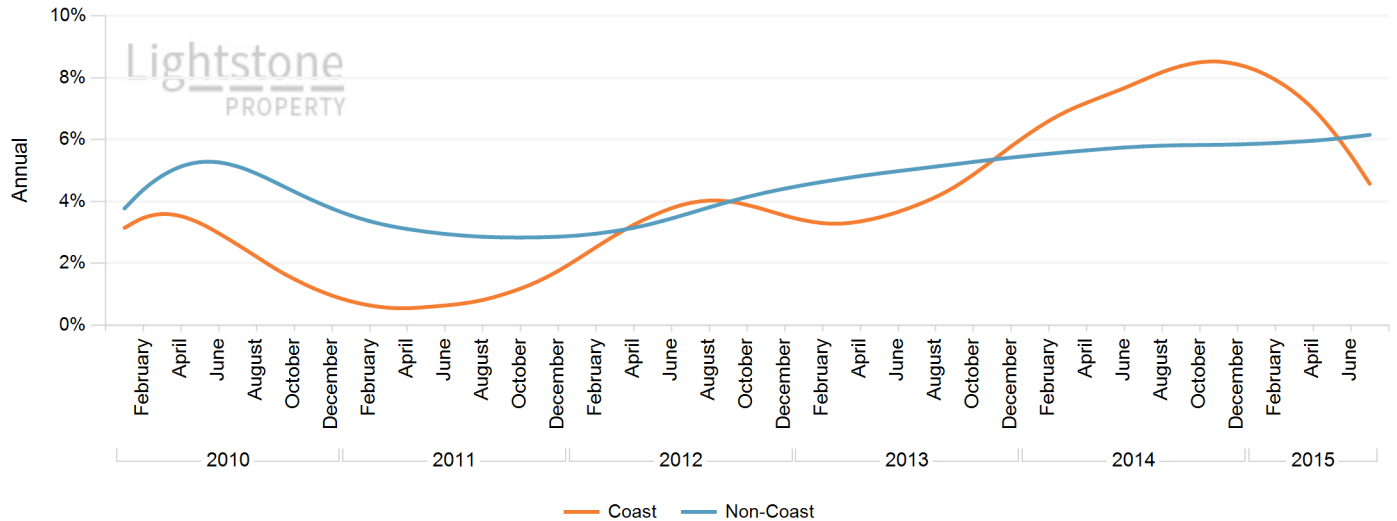

### Annual Inflation: Coastal Municipalities

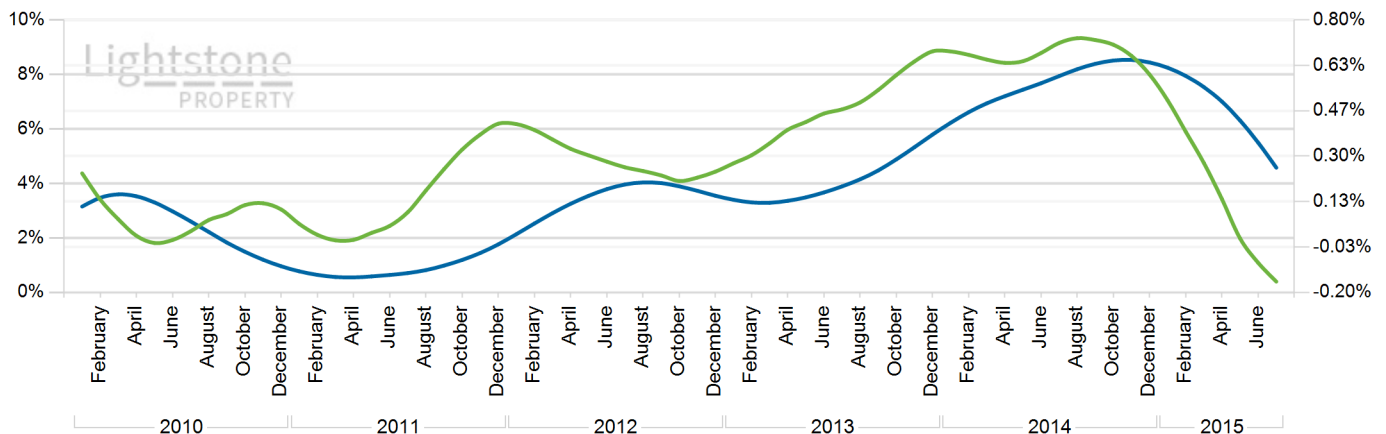

## Property Inflation: Coast vs Non-Coast

The Lightstone Coast vs Non-Coast Index compares property located within enumerator areas 500m of the coastline to those located further inland.

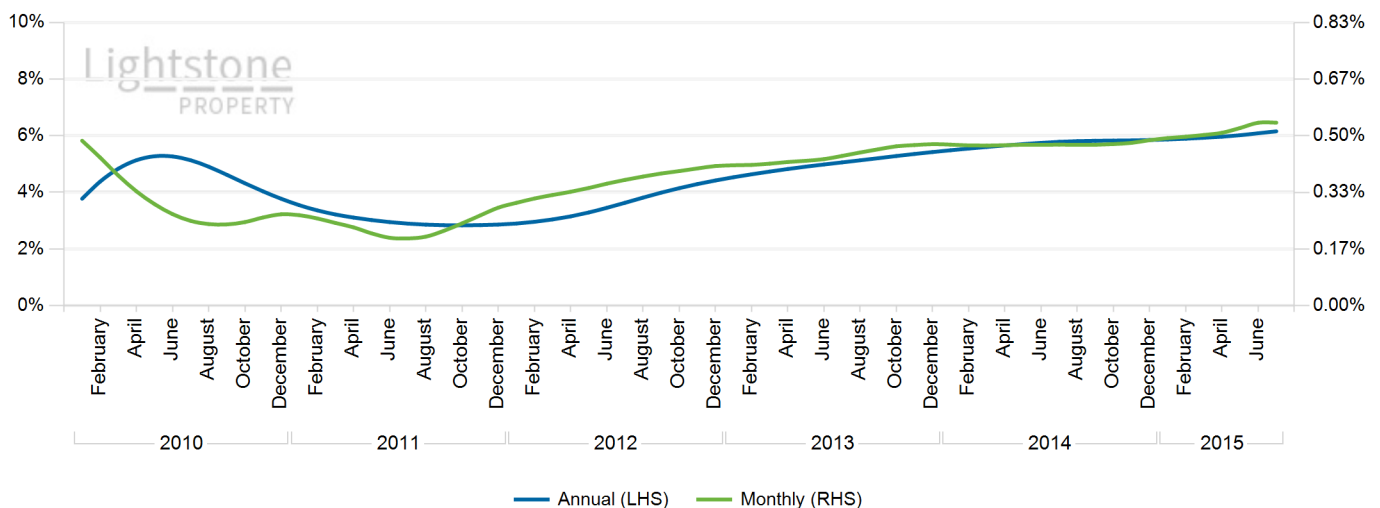

### Annual Inflation: Coast vs Non-Coast

### Coast: Annual vs Monthly Inflation

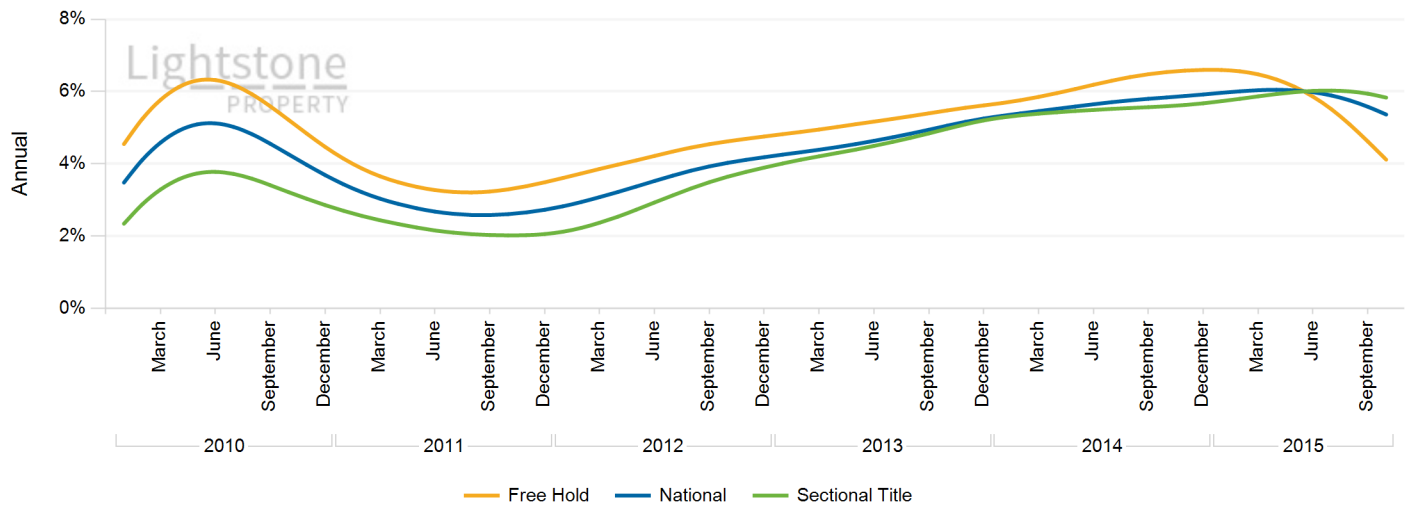

### Non-Coast: Annual vs Monthly Inflation

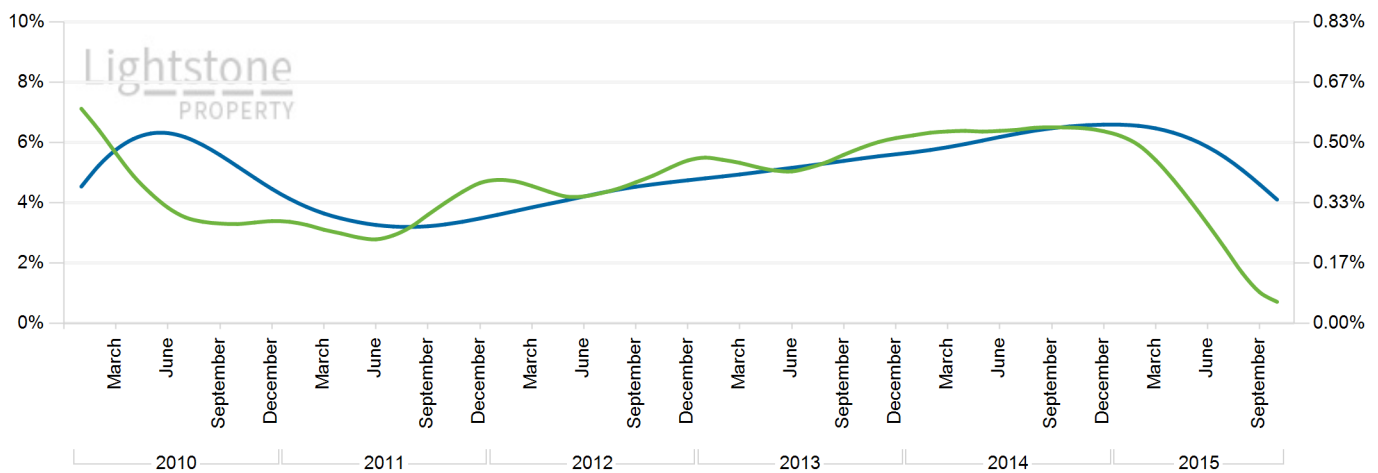

## Property Inflation: Free Hold vs Sectional

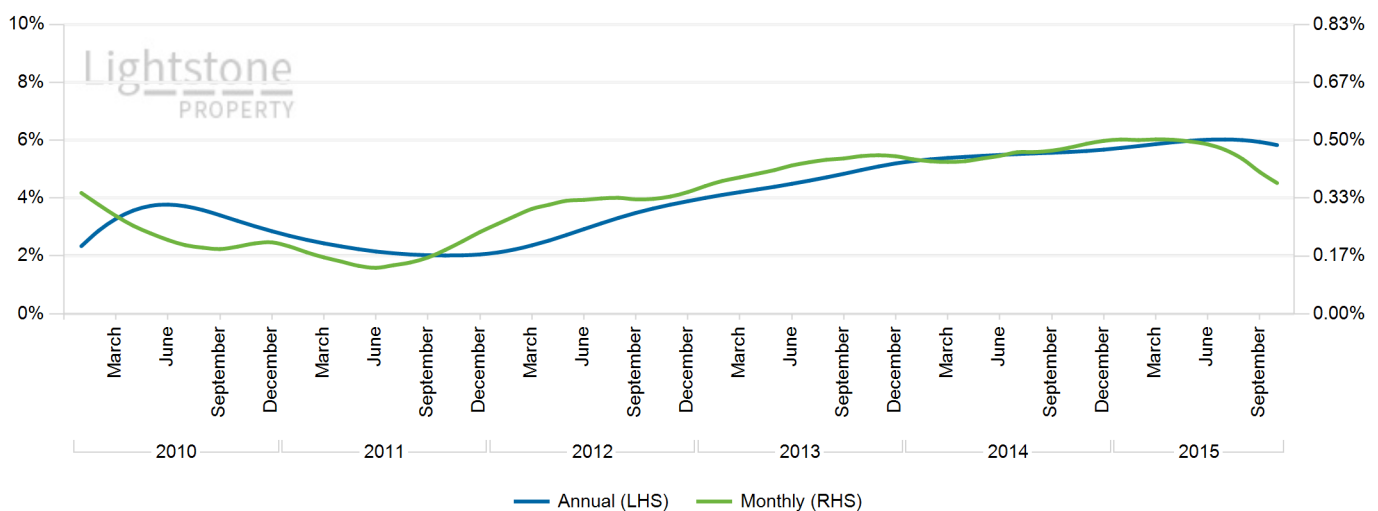

Annual Inflation: Free Hold vs Sectional Title Properties

Freehold Property: Annual vs Monthly Inflation

Sectional Title: Annual vs Monthly Inflation

## Property Inflation: Value Bands

The Lightstone Area Value Bands Index reviews inflationary rates for property based on the following values.

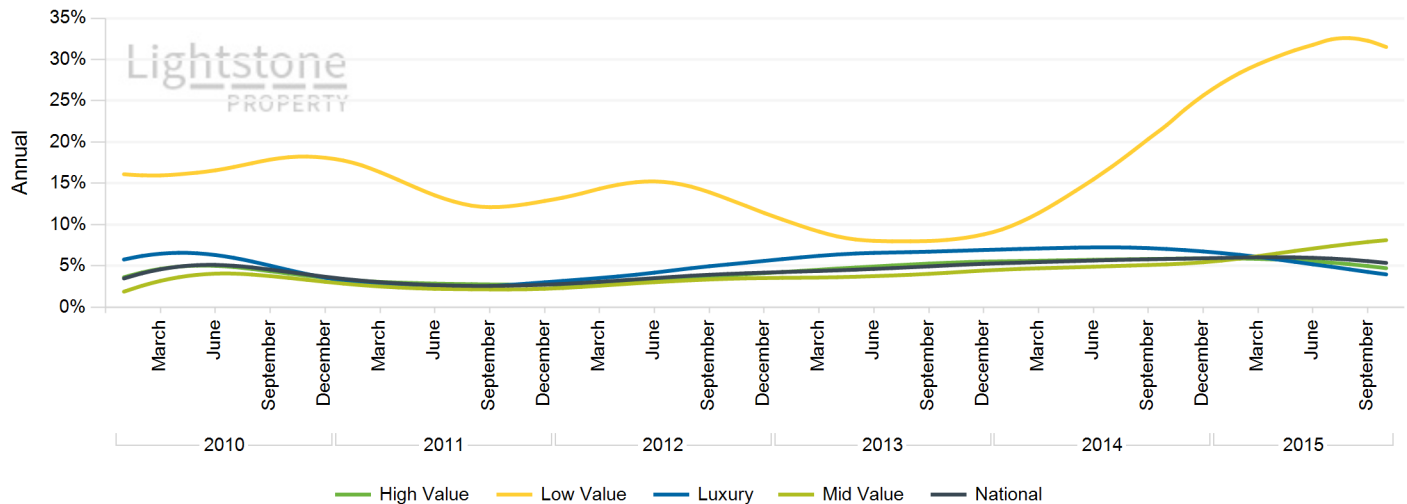

Luxury: > R1.5mil

High Value: R700k to R1.5mil

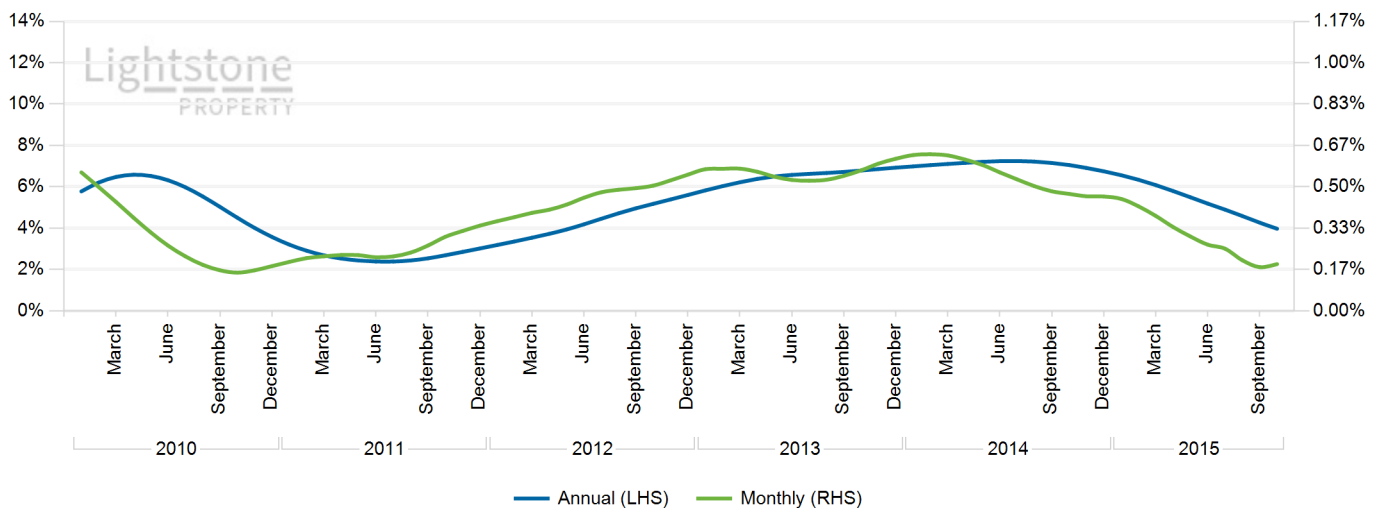

Mid Value: R250k to R700k

Low Value: <R250k

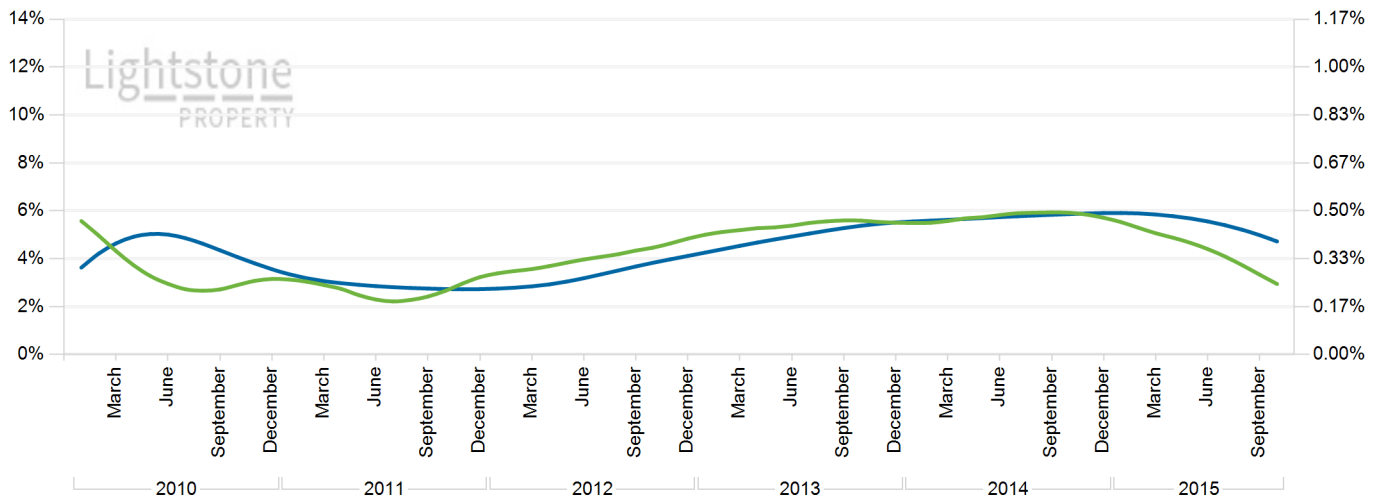

### Annual Inflation: Area Value Bands

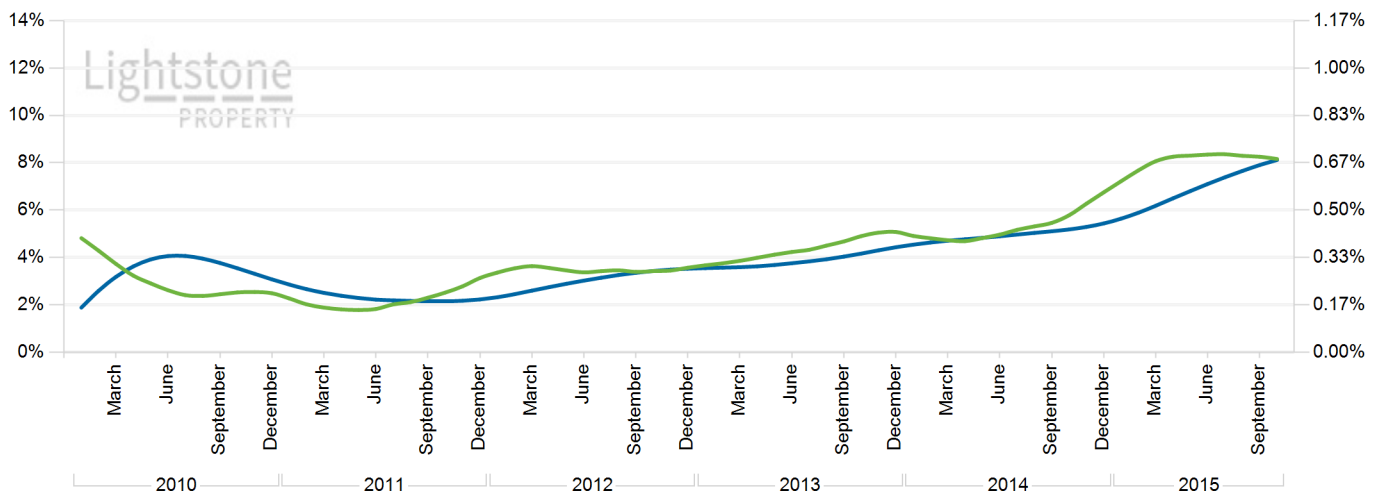

### Annual vs Monthly Inflation: Luxury Property

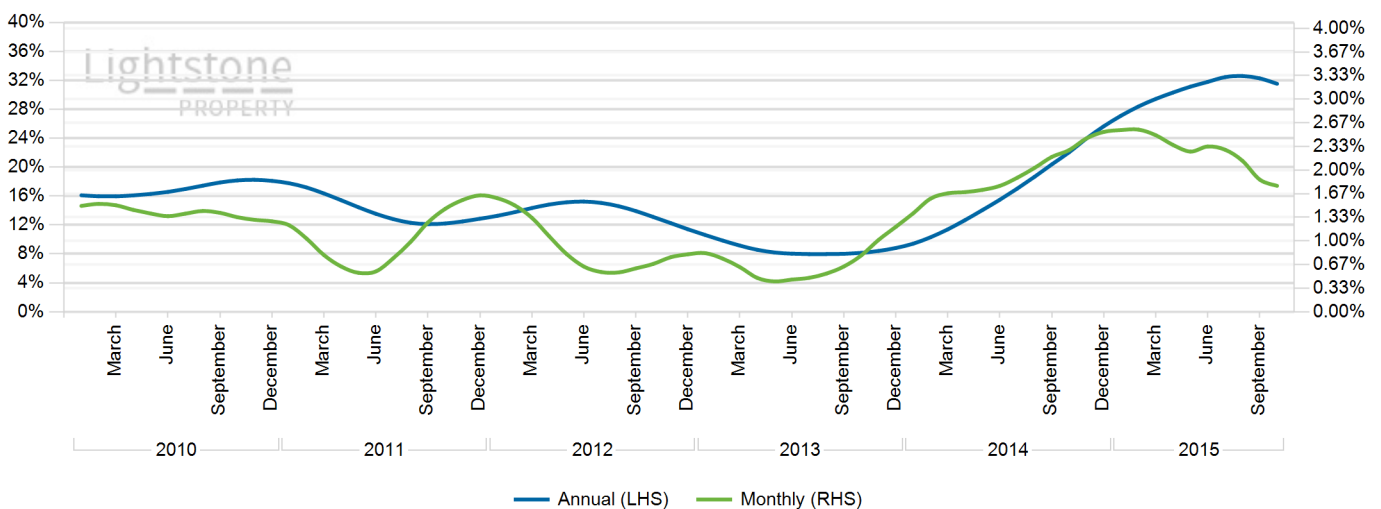

## Annual vs Monthly Inflation: High Value Property

## Annual vs Monthly Inflation: Mid Value Property

## Annual vs Monthly Inflation: Low Value Property

## Inflation Table

The **Annual Inflation Table** (below) provides a long term view of annual rates of inflation for various geographical areas and property types.

Please note that historic inflation rates can change as transactions occur that imply price inflation for those periods.

		2010	2011	2012	2013	2014	2015

## Shining A Light On Our Approach...

### Methodology:

Lightstone applies the repeat sales methodology when reviewing and reporting on property data. In contrast to 'average house price' indices, repeat sales indices provide a measure of the actual price inflation of houses that have transacted twice within a particular period of time. The main benefit of this is that it is less influenced by the mix of transacting properties. The repeat sales methodology is recognised as the premier methodology for indexing house prices and is used by many international residential property price indexers including the Office of Federal Housing Enterprise Oversight (OFHEO) in the United States.

### Data:

All property transactions in South Africa are registered in the Deeds Office and each record contains the legal details of both the property and the transaction. For the purposes of the Repeat Sales Index for residential properties, the following transactions have been excluded: farms; any transactions which may be of a development, commercial or community services nature; new developments; sales made in execution of a judgement; non-arms-length transactions; transactions where the inflation is extremely different to the norm of the statistical distribution of inflation rates; and township transactions.

### Caution:

Lightstone presents both annual and monthly inflation rates. Monthly inflation emphasises recent market performance (i.e. month on month) and is more volatile than annual inflation trends. Conclusions about the future trend of annual inflation, based on monthly inflationary rates, must be made with caution.

### Disclaimer:

The Lightstone Repeat Sales Index system applies advanced statistical methods to a comprehensive property database - compiled from the Deeds Office, the Surveyor General and other sources - to generate repeat sales inflation data for individual residential properties. Despite the statistical and actuarial rigour applied, Lightstone cannot guarantee the accuracy and reliability of the data. Furthermore, the index is a statistical tool and does not amount to advice and may not be applicable in some cases. Lightstone does not take responsibility for any losses incurred as a result of any person acting or omitting to act as a result of the publication of this index.
